- Microservices
- Html/Css
- Activemq
- Github
- Hibernate
- AWS
- Elastic Search
- Docker
- Html/Css

CERTIFICATION

- G. S. MOZE Technical Event Certificate

WORK EXPERIENCE

Java Full Stack Developer - e-Zest Solutions.

Aug 2022 - Present

- Designed and developed core modules ensuring high performance, scalability, and functionality.
- Developed robust API endpoints, ensuring seamless integration and data accuracy between Angular frontend and Java/Spring Boot backend.
- Led a cross-functional team to identify and resolve over 30 critical production bugs within strict deadlines, reducing bug resolution time by 25% through the implementation of a standardized code review process.
- Translated user story requirements by collaborating closely with product owners; proposed innovative solutions that increased user satisfaction by 25% and boosted user engagement by 20%.
- Delivered end-to-end frontend and backend development, managed product deployment, and conducted comprehensive application debugging to ensure optimal system reliability.

INTERSHIPS

Web Developer Intern, Knowlexon innovation pvt. ltd.

91 Days

- Developed and deployed 5+ responsive web pages using HTML5, CSS3, and JavaScript, enhancing user experience across devices.
- Achieved a Google Lighthouse performance score above 90 by implementing image optimization and lazy loading techniques.
- Created and unit-tested reusable UI components, decreasing front-end code duplication by approximately 30%.
- Accelerated feature development velocity by streamlining component reuse and improving code maintainability.

PROJECTS

PRODUCT RECOMMANDATION SYSTEM

120 Days

A product recommendation system is a tool that recommends products to a client and suggests which products should be

kept together for more selling. this tool takes the billing data of customers and product data as input. The technology used in this software is Java and the frontend is designed in Java Swing. It is a helpful software for offline stores to increase sales and efficient management of products in store.

WEB FLAW DETECTOR USING SQL-INJECTION

120 Days

Web flaw detector is software that finds vulnerabilities in websites and generates reports of bugs. It used XSS and SQL-Injection methods to find vulnerabilities.

EDUCATION

2022
